Ultimate Banners Launch New Pop Up Display

Ultimate Banners launch a new super sized pop up system that will rival roller banners.

Ultimate Banners is known for its super print quality furnished on top of roller banners. Whilst Ultimate Banners are well known for roller banners it also has other items in its product range which are proven to deliver successful indoor advertising results.

Pop up displays are similar to roller banners, however they are three times larger and much more eye catching and rather stable. Pop up displays can have graphics printed on panels which magnetically attach to a skeleton framework. Ultimate Banners are using pop up displays to showcase product artwork for customers in landscape orientation (3m wide). Traditional roller banners can only showcase portrait orientation artwork (0.8m-1.5m wide).

The team at Ultimate banners can assist customers with artwork and they curate printer friendly artwork tips for designers on their blog which is regularly updated. The extended service beyond phone and email is designed to ensure customers get the most out of their systems and avoid costly mistakes if they are placing large format print orders for the first time.

Sizes of pop ups are 3x3 and 3x4 (3 banners wide or 4 banners wide). The banner wall can be straight or curved. Artwork can be printed to cover one side of the wall or the front and reverse of the wall (double sided).

Ultimate Banners make a promise to its customers to deliver the best portable signage with the highest quality print. To browse the latest [pull up banners](#) visit the website.
